Farm Credit Sponsors Adirondack Research Consortium Bio-Fuels Manufacturing Conference in Saratoga Springs, NY

The Adirondack Research Consortium has received a grant from Farm Credit Northeast AgEnhancement Program in support of a Bio-Fuels Market Development One-Day Conference to be held Wednesday, February 17, 2010 at the Holiday Inn, Saratoga Springs, NY.

The conference will focus on four key areas of this emerging industry: biomass market supply and demand, policies affecting biomass energy markets, project finance perspectives, and technology. This conference will bring together people to discuss these topics from the perspectives of developers and investors.

Farm Credit has more than 90 years of lending experience serving people involved in agriculture, forest products, and agribusinesses. Farm Credit serves nearly 15,000 customers in New York and the other Northeast states. "If we are to expand energy resource options and grow our regional economy which depends on agricultural and forest products businesses, we need good information and collaboration. The Adirondack Research Consortium's Bio-Fuels Manufacturing Conference is an excellent opportunity to accomplish these objectives", said Farm Credit Vice President, Robert A. Smith.

The Adirondack Research Consortium is based in Paul Smiths, NY. Its goals are to enhance vibrant communities, working landscapes, and wild places through research, collaboration, and communication. In addition to the Annual Conference on the Adirondacks, held this year May 19th and 20th, 2010 at the High Peaks Resort in Lake Placid, the Consortium holds information exchanges and specialty conferences throughout the year.

The Bio-Fuels Conference is open to all interested individuals. To register, get more program information, or learn more about the Adirondack Research Consortium, visit the webpage at adkresearch.org, or call Dan Fitts at 518-523-1814.
